

## Conceptromec de México S. de R.L. de C.V.

**Design- manufacturing -assembly of machinery, high precision machining, production and sales of high technological automation systems**

Established in 2008, Conceptromec de México designs, produces and commercializes high technological automation systems for rubber and plastics applications. Since the beginning, Conceptromec performed brilliantly in the design, manufacturing and development of automated equipment for the automotive sealing industry.

The company's customers are located in Mexico, United States, Canada, Brazil, Korea, China, and Europe.

### Products

Tooling automated equipment  
- Extrusion conveyors and uncoilers, and custom equipment, mainly for the automotive sector. It also manufactures insert machines, automatic notching equipment, semi-automatic notching units, among others. Currently offers its services of high precision machining, design, manufacturing and assembly of small machines

### Processes

Design of equipment of high accuracy  
Manufacturing parts of high precision  
Welding & painting process for equipment  
Services in high precision machining  
Assembly  
Electrical, mechanical and pneumatic installation

### Capabilities

Full range of equipment of ingenious design and an effective "just-in-time" manufacturing system  
CNC equipment, milling machines, EDM wire, lathes, grinder machines, saw tapes and welders
