

Manufacturer of stamped and welded metal parts for trailers

DBG is a premier stamping, fabrication, modular assembly, tool & die maker, weld services and line sequencing, manufacturing company.

DBG has full service facilities in Apodaca, N.L., Mexico and Mississauga, Canada. Over 650 associates throughout North America delivering leading edge products and services to a wide range of markets and industries.

Products

- Production and engineering services
- In-house tool & die design, advance engineering & automation
- State-of-the-art formability software
- Build to math design & build process
- Conversion specialist
- Production process simulated prototyping
- Rapid & reliable pilot and prototypes
- Cost & weight reduction initiatives
- Round & shaped fuel tank manufacturing
- Assembly and sequenced modular assembly lines
- Destructive and non destructive tests

Processes

- Metal stamping fabrication
- Processes for carbon, aluminium & SST

Capabilities

- Stamping: Transfer, progressive & hand transfer presses lines up to 2,000 T, difficult forming & deep draw capabilities
- Fabrication: Shears, break presses, CNC turret punch presses and laser & HD plasmas
- Welding process: Robotic & manual weld cells and spot welder cells (GMAW, GTAW & RSW) under AWS Code D1.1 & D1.2
- Modular assembly & sequence: fuel tank lines and battery box assembly lines
