

## H.P. Gages Inc.

### Design and manufacturing of gages

HP Gages is dedicated to supplying world-class gages and data collection systems. We utilize tooling and automation equipment designed and built to the highest industrial standards. Our focus is to provide custom and efficient measuring solutions of your pneumatic, electronic, mechanical or vision measuring needs and provide precision gages of all types from attribute gages, variable data gages, air gages, electronic gages and standard products. Whether a functional or custom automatic gage, we maintain repeatability, stability and quality for your critical components. Our commitment to product research and development is a result of our growth, capabilities, product offerings and state-of-the-art technology.

### Products

#### Gages

- Manufacturing of custom made gages: attribute gaging, variable data gaging, customer components, standard products (AGD master rings, disks, electronic gage columns and computers). Gages for the engine and drivetrain

### Processes

Metforming machining casting processes

### Capabilities

Design and development process  
Air & electronic offline and inline gaging  
Variable and attribute gaging  
Data collection for statistical analysis and feedback
