

## KSR International S. de R.L. de C.V.

**Manufacturer of electronic throttle controls, adjustable and fixed pedals**

Established in Mexico in 2007, KSR International is an industry leader in the design, engineering and manufacturing of all pedal systems - adjustable and fixed pedal modules.

KSR products are designed, engineered and tested to meet the exacting standards of their customers.

### Products

Body control

- Pedal systems, adjustable and fixed pedal modules. Each system integrates the brake accelerator and clutch pedal all in one engineered system

Sensors

- Both inductive and hall effect programmable non-contacting sensors

### Processes

Designing

Stamping

Welding

Assembly process

Plastic injection molding

### Capabilities

Full design capabilities to deliver turn-key solutions ranging from component-level electronic design to full upper assembly integration

Sensor solutions for OEMs and Tier 1 suppliers

Equipped with presses with a capacity of 100 up to 500 T, progressive and single stroke, welding robots (MIG and resistance), assembly lines and injection molding machines of 600 T
