

## SLP MI Integración S. de R.L.

### Designer and manufacturer of injection components and molds since 30 years

As part of the MI Integration Group, this company was established in Mexico in 2011, focused on the design and manufacture of automotive injection molded components and molds.

Our Vision: Integrator of innovative solutions to optimize our global clients' performance internally and with their own clients, by focusing on leading-edge designs and customized production.

Its services range from part design to part production, via mold design and mold fabrication. In Mexico the company manufactures automotive sealing system and injection molded components.

### Products

- Sealing systems and thermoplastic solutions
  - Injection molds for rubber and thermoplastic
- Technical injection molding: two-shots molding, functional and cosmetic parts (PP, TPE, Nylon, PC-ASA)
- Injection molds
  - Corner seals, under the hood components, co-injection
- Secondary tools
  - Extrusion die, thermoplastic parts inspection, components assembly
- Thermoplastic solutions
  - From part design to production, MI Integration has all the resources to take an idea and bring it to a feasible and cost efficient thermoplastic solution

### Processes

- Engineering & design
- Mold adjusting
- Prototype tools
- Production of parts
- Production tools

### Capabilities

- The plant is equipped with injection machines that range from 80 to 700 T, including the two-shot technology
- 5 axis CNC, EDM, EDM drill, milling, laser / TIG welding
