

Tubos Samuel de México S.A. de C.V.

Manufacturing plant for stainless steel tubing

Tubos Samuel de Mexico (TSM) is part of Associated Tube Canada, which specializes in welded stainless steel tubing manufacturing. TSM was founded in 2006 in Saltillo, Coahuila.

TSM's main products are stainless steel tubes for automotive fuel systems and HVAC. TSM also offers CNC machining for direct injection fuel rail tubes.

Products

- Welded stainless steel tubes
- Automotive fuel lines, fuel rails and fuel fillers
- HVAC equipment

Processes

- Metal forming
- Roll form, weld, test, anneal, and cut to length
- Machining
- Machining and drilling of fuel rails

Capabilities

- Straight lengths to 65 ft. (20 m)
- Coils to 8,000 ft (2,400 m)
- Custom cutting capabilities
- Diameters 3/16" (4.7 mm) to 1-1/2" (38 mm)
- Equipped with mills for tube manufacturing annealing, cutting and de-burring
