

BSB Manufacturing México S. de R.L. de C.V.

Production of iron, aluminium and steel CNC machined parts

BSB Manufacturing Mexico is a family owned business, originally from Ontario, Canada. The company specializes in, but is not limited to, production of CNC machining of iron, aluminium, steel castings and forgings for industries such as automotive, construction, agricultural, heavy truck and other commercial products. BSB Manufacturing also provides end-to-end supply chain management and logistics for their customers. As it is an ISO TS 16949 certified company, the facility is able to fulfill and satisfy the customer's quality needs.

Products

CNC machined parts

- Pistons, hubs, adapters, frames, bell cranks, connector links, knuckles and carriers, among others

Processes

- Turning
- Vertical and horizontal machining centers
- Multi-spindle high volume automated cells
- In-house assembly & testing
- Leak testing of oil pans
- Timing covers
- Design

Capabilities

- CNC vertical and horizontal machines
- Grinding
- Turning
- Tapping centers CMM inspection
- Design, use of 3D modeling in solid-works
